

SQL Commands – DELETE

DELETE is used to delete records:

```
DELETE FROM table
```

```
WHERE search_criteria;
```

- Note that you can delete more than one record at once...

SQL Commands – DELETE

```
DELETE FROM foods
```

```
WHERE ProductCode = "4550F";
```

- The “quotes” are important where fields are data type string

SQL Commands – DELETE

```
DELETE FROM foods
```

```
WHERE Supplier = "S121/A";
```

- This will delete every record which uses that supplier

SQL Commands – DELETE

```
DELETE FROM foods
```

```
WHERE Stock < 150 AND Price > 0.99;
```

- You can use multiple search criteria again
