

Ethics, legal & environment

Computing impacts all of these:

- ethical
- legal
- environmental

Ethics, legal & environment

“Ordinary citizens normally value their privacy”

Ethics, legal & environment

“People may not like it when governments or security services have too much access to private data”

Ethics, legal & environment

“Governments and security services often argue that they cannot keep their citizens safe from terrorism and other attacks unless they have access to private data”

Biometric fingerprints

Your passport probably has a biometric data chip in it.

What data is stored?

How does the passport work?

Why is this done?
