

Rollover Images

These are sometimes required. Don't use them unless the exam paper specifically asks for them or there is an **obvious** need.

1. Prepare both the main image and the one which will appear when the rollover happens

In an ideal world the images will be **exactly the same size**

2. **Insert > Interactive Object > Rollover**
3. Browse for the main image (the "Normal")
4. Tick the **Over** box
5. Browse for the rollover image (the "Over")
6. Click **OK**
7. To add a hyperlink simply **right click > Hyperlink**

Test the rollover in the web browser to check that it works.
