

I like to wear fashionable clothes

Workers in the fashion industry are badly treated

The fashion industry doesn't cause environmental problems

People who work in the fashion industry are really glamorous

There aren't many jobs in the fashion industry

Adverts force young people to buy expensive brand names

Jobs in the fashion industry aren't very well paid

It's better to have a poorly paid job than no job at all

I'm more interested in what my clothes look like than where they come from
