

What are Digital Graphics

The exam board tends to define a digital graphic as:

a graphical product which is a combination of images and text

Digital simply means that it's been produced, processed or stored on a computer - it could have been produced by hand and scanned

You do not need to include a definition at all in your work. If you use this resource you need to reference it: Ford I (2019) 'What are digital graphics' at bluesquarething.co.uk [DATE YOU READ THIS]
