

File formats

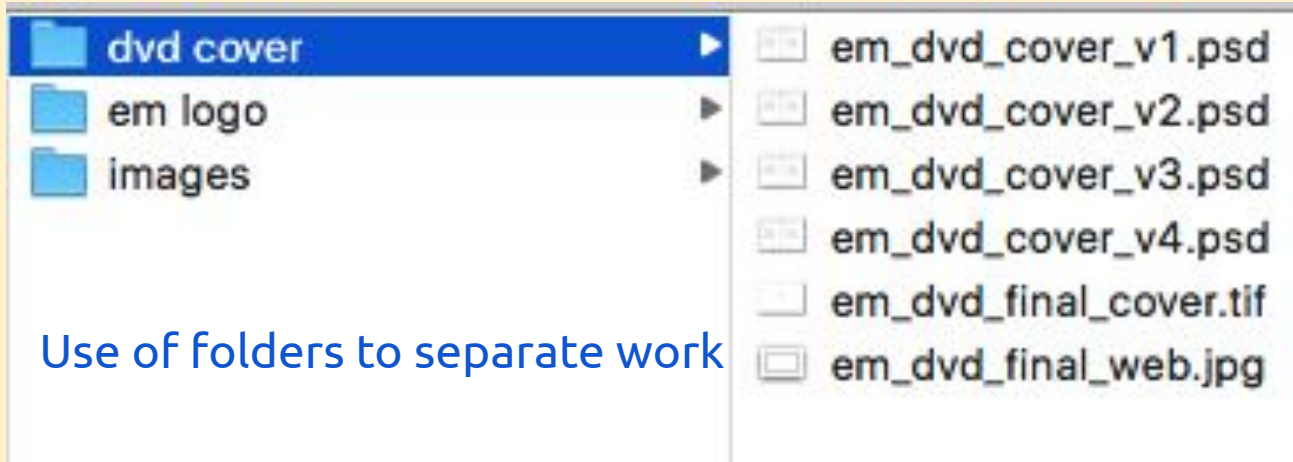

You need to **evidence**:

- work has been **set up** in the right way
- work has been **exported** as suitable file types and at the **required resolution**
- files are stored sensibly in **folders**
- files and folders are **named properly**

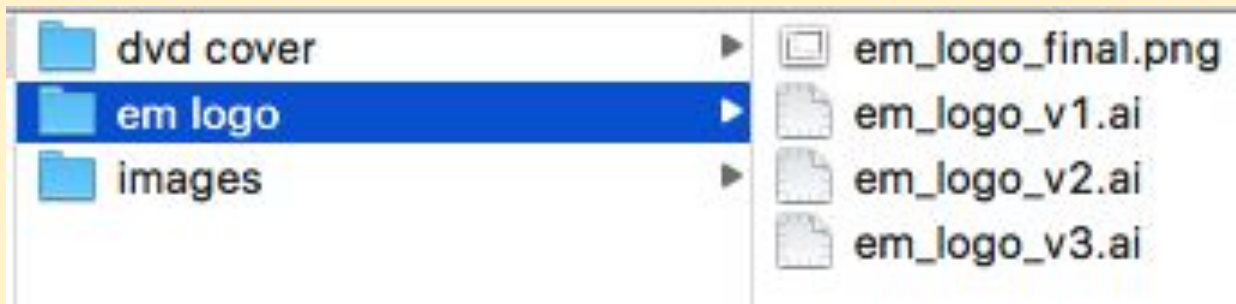

This involves using **version control**

Files and folders

Working versions as
PSD files

Final version
formats suitable

Version control

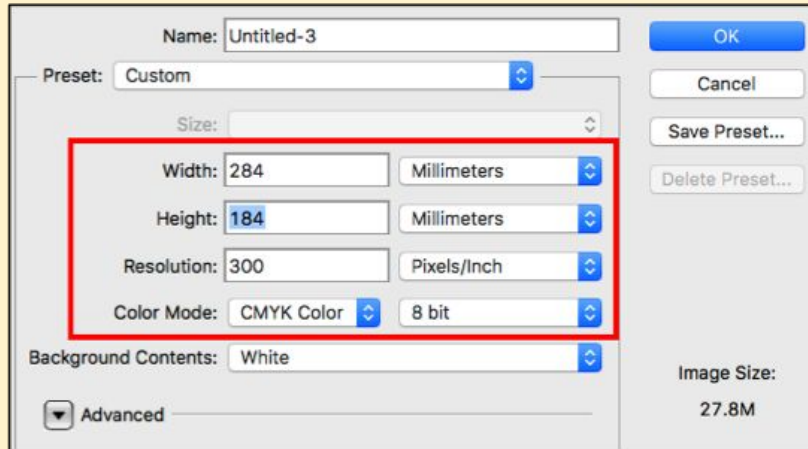

Appropriate
formats used

I also want to see the contents of the images folder

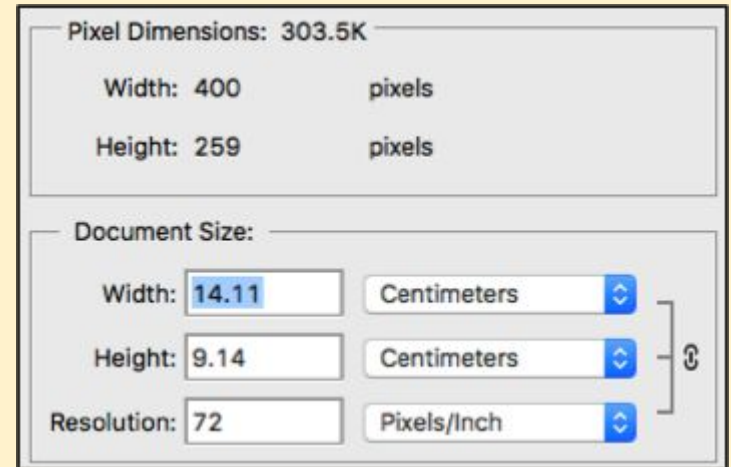

Suitable filenames in
all cases.
No odd symbols or
long names

Files and folders

Setup - with 300ppi

Final web version size and ppi

Final file types
