

Website workflow

1. Client needs (mindmap?)
2. Audience needs - age, gender, income, accessibility etc...
3. Research locations, style and layout - gather info
4. Moodboard???
5. Work plan - time planning
6. Site design and page layout diagrams - annotated
7. Identify assets (from plans) and IT resources needed
8. Test plan - use template
9. Gather assets and edit - use assets table
10. Build website pages
11. Test and improve
