

# IDMP skills – create video

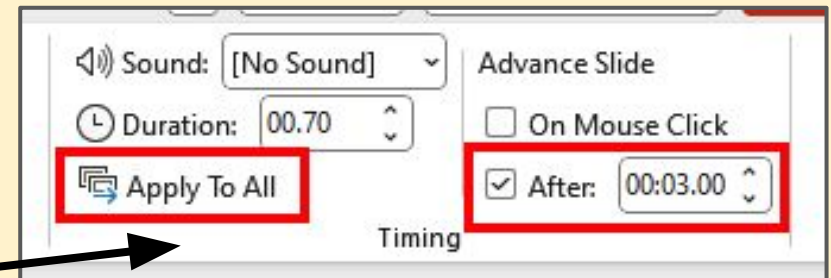

Create a slide show of images

You can create simple video from still images using PowerPoint

Add simple **transitions** to every slide – fade works well

Then set the time you want each image on screen and **Apply To All**

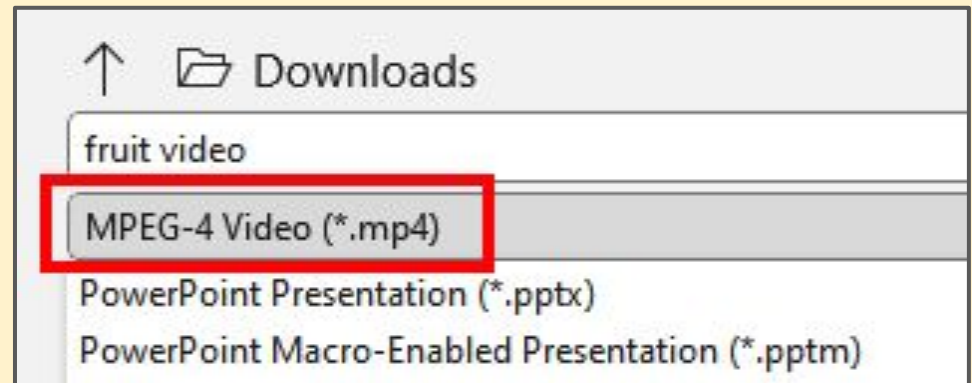

# IDMP skills – create video

Then export your video:

**File > Save as** or **File > Export > as Video**

Make the filetype a video format – MP4 works well

Then insert your video into your presentation in the normal way
