

Image editing

Cropping the image in
PhotoPaint to get a
square crop
Using the crop tool
Holding Control down to
force the crop to be
square

Adding a Hue/Saturation/Lightness layer
Increasing saturation to make the colours bolder
Changing Hue to change the colour to create a better effect

Adding and styling text
Changing font, size and colour for impact

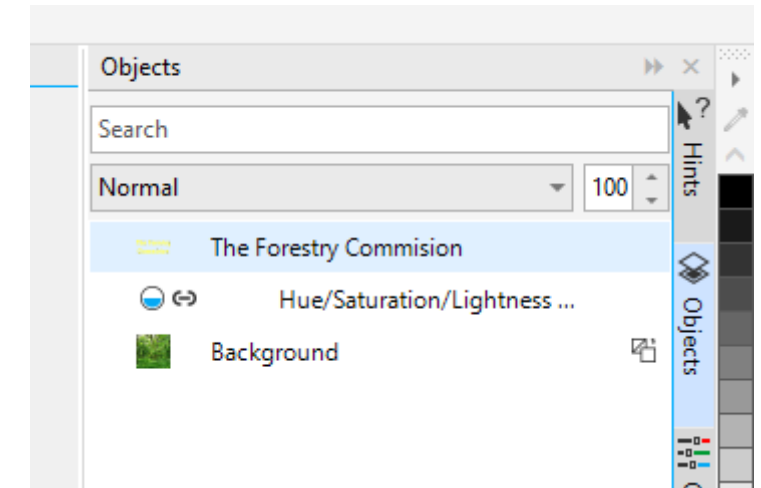

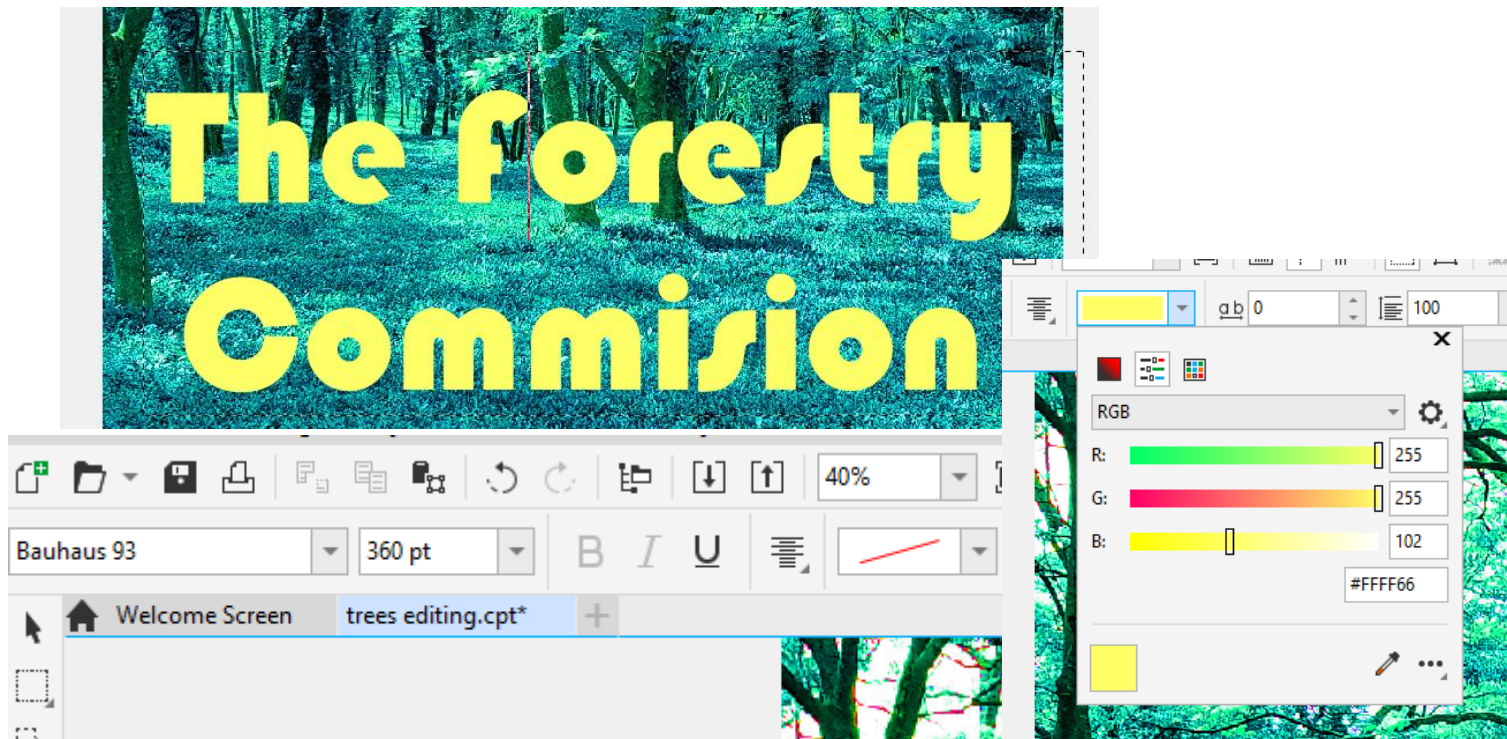

Image using three layers

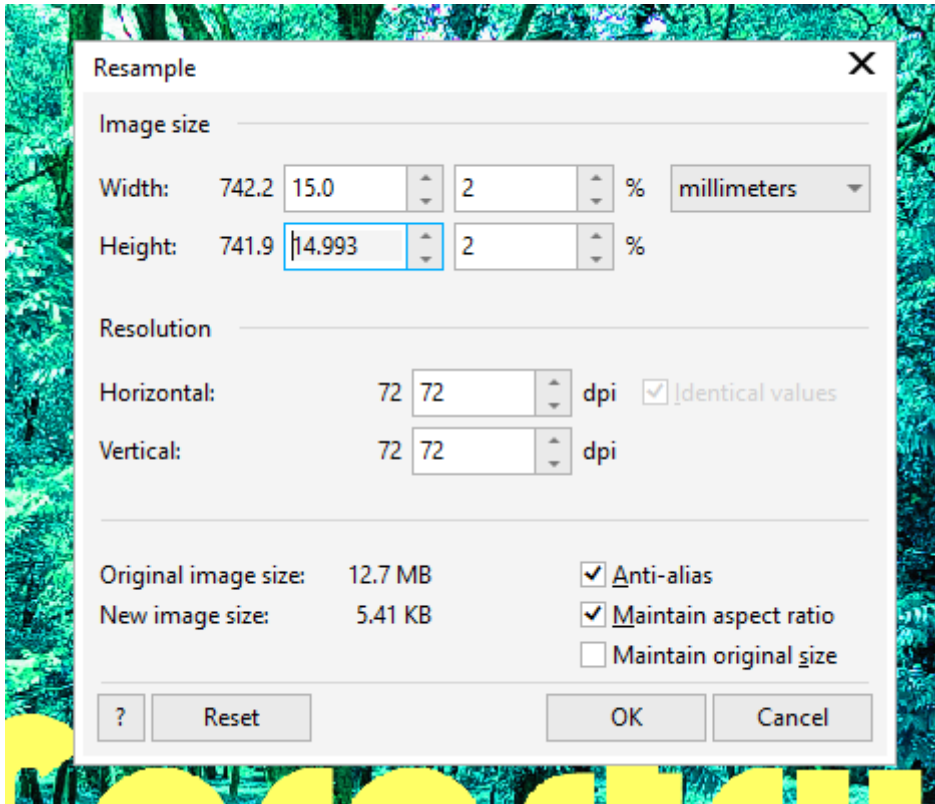

Image resampled to change size to an approximate size I might use it at. I can reduce the size further in PowerPoint if necessary

Resampling reduces the filesize making the final product quicker to load – original image is 4.04MB; final image is 56KB

Name	Status	Date	Type	Size	Tag
 trees editing	✓	03/12/2025 14:58	Corel PHOTO-PAI...	12,848 KB	
 trees final	✓	03/12/2025 15:02	JPG File	56 KB	
 trees og	✓	03/12/2025 14:13	JPG File	4,138 KB	

Final version exported as a JPG with flattened layers. This file type is easy to use in PowerPoint and will reduce the file size because it is a compressed file
