Codes for communication

We know that:

- secret codes are used in computing
- there are all sorts of thing we don't want other people to know
- **data** stored on computers is encrypted so that people can't read it
- **substitution ciphers** replace each letter with another letter or symbol
- **substitution ciphers** are easy to break

crypto graph

Codes for communication

Cryptography is the encoding and decoding of messages using secret codes

The word comes from the Greek words **kryptos**, meaning "hidden," and **graphein**, meaning "to write"

So **cryptography** means "hidden writing" or "secret writing"

Codes for communication

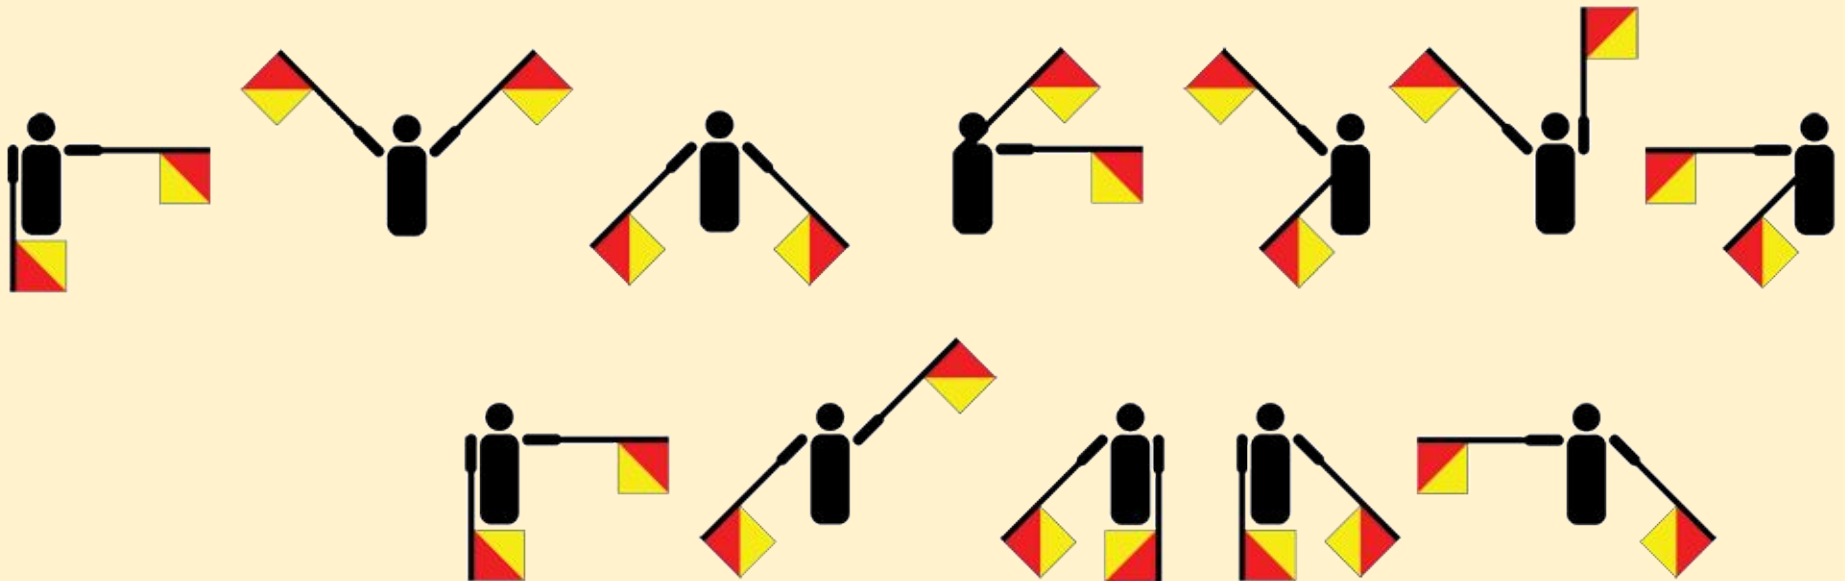

Task:

1. Write down the meaning of the word **cryptography**
2. Use the **Wingdings** font to encode a secret message

Codes for communication

What is this code?

How does it work?
