

Filmora – exporting video

1. At the **top right**, click the **green Export button** > choose **Export to Device**

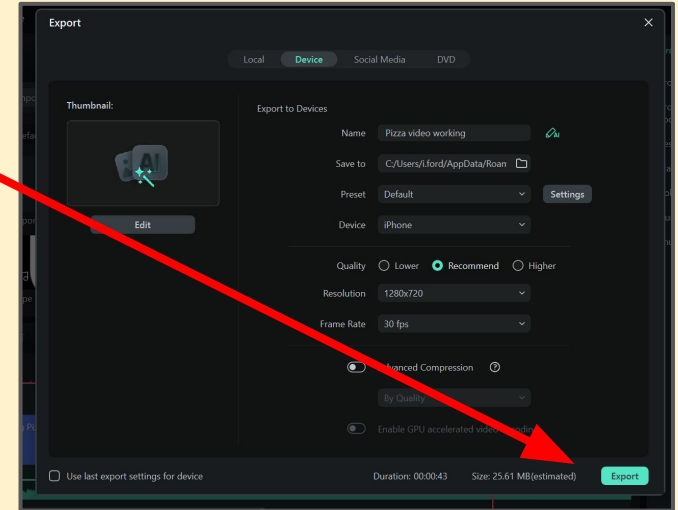

2. To export video you need to have a Filmora account
a) Click **Create new Account**
b) Create an account using your **school email address**

Filmora – exporting video

3. A set of options appear. Click **Export** in the bottom right

4. Choose **Export with Watermark**

Export with Watermark

- ✓ Keyframe, Planar Tracking, Multi-Camera Editing
- ✓ Auto Reframe, Supports 4K

Purchase

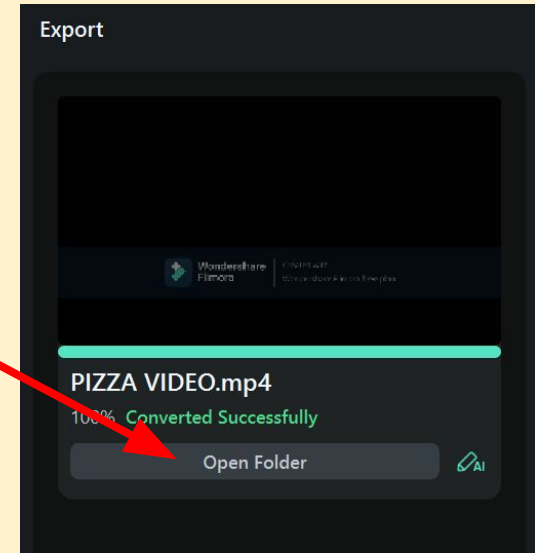

5. Wait for the video to export – this can take some time

Filmora – exporting video

6. Filmora will probably have exported your video to a slightly random folder that **you won't be able to find**

Click the **Open Folder** button once the export is finished

Copy your video into your project folder

7. **Double click** the video and, if you get a choice, choose to open it using **Windows Media Player**

Check the video – sometimes exporting doesn't work perfectly first time
