

# AI image investigation

## Hypothesis:

AI can be used to effectively identify items in images

# AI image investigation

## Method:

Use a variety of primary and secondary research to test the hypothesis

## Primary:

- use the 3 computer vision examples
- use the Image Recognition Tool to explore images you have downloaded

**Secondary:** explore different examples of the use of image recognition (provided)

# AI image investigation

## Writeup:

Write your investigation up. Save it and share it with me

Use 4 sections:

- Hypothesis – what it says; what it means
- Method – what you did
- Results – what you found out
- Conclusion – is the hypothesis proven or not?
