CheckAI Challenge answer sheet

Challenge 1 – Fake accounts

Identify the **three** fake profile pictures. Check your answers. The three correct answers will give you a **3 digits**

Guess 1	Guess 2	Guess 3	Guess 4	Guess 5	Guess 6	Code is the 3 digits added together

How easy was it to tell which were fake?	
What could AI developers do to make it easier to check for fake images?	

Challenge 2 – AI Research errors

Error 1	
Error 2	
Error 3	
Error 4	

Challenge 2 continued:

How could you reduce the chance of AI errors in your research	
If you used AI to help with school work, what could you do to make your use of it responsible?	

Code is the **corrected** number in one of the statements with its digits **added together**

Challenge 3 – Spot the bias

For each scenario, identify any bias, an explanation, and a solution. Each statement number (1–9) gets placed in the table

Only use each number once

Scenario	Bias	Explanation	Solution	Code is the numbers from the bottom row added together
1				
2				
3				

The final code

Final code is three code numbers joined together to make a **6 digit number**
