

# Formula in Excel

Spreadsheets can be used to do calculations really quickly

The basic way to do this is to use a formula

# Formula in Excel

## Formula

A formula can be used to do a simple calculation

There are good for addition, subtraction, multiplication and division

- formulae **always** start with =
- the answers **update** when you change numbers in cells

# Formula in Excel

## Formula

Simple formulae:

=B3 + 7

=B3 – B5

=B3 \* 2      The \* is used for **multiplication**

=B3 / 4      The / is used for **division**
