

Repeat code

This is how you repeat code in micro:python:

```
1  # how to repeat code
2  from microbit import *
3
4  # code here only runs once
5
6  # code in a 'while True:' loop repeats forever
7  while True:
8      # code here repeats forever
9
```

Indenting the code is **really** important to get right...
