

# Interactive Multimedia LO2

Navigation plans: aim to show how “pages” of your presentation will link together - what links to what.

Can be done with a flowchart and/or a diagram showing which buttons are on which page.

# Interactive Multimedia LO2

Home page: likely to link to the two sections

But what about after that?

- These slides show some ways you could do that.
- You can combine the first diagrams with your visualisation diagram if you want, or have simply link diagrams.
- Then you can produce a flowchart style diagram as well
- There are other ways to do this as well
