

Video storyboard WCF

Next steps:

1. Check that you have identified **clip numbers** on **all** clips
2. Check that edited **timings** have been added to **all** clips
3. Still images – identify **where** and **what** – make it clear
4. Check you have **sketches** to show what the final video will look like

Video storyboard WCF

What went well

- Work that shows what the video will look like
- Some detailed storyboards

Even better if

- Some are unfinished or really rough
- Clip numbers need to be used
- Timings need to be clear

Excellent work

- Some good examples of detailed sketches
- Some examples where notes had been added to show more detail

Next steps:

1. Check that you have identified **clip numbers** on **all** clips
2. Check that edited **timings** have been added to **all** clips
3. Still images – identify **where** and **what** – make it clear
4. Check you have **sketches** to show what the final video will look like
