

# Rule of Thirds

The **rule of thirds** is a way of **composing** “better” images

It's used in art, photography and graphic design

- divides images into “thirds” - giving 9 equal boxes
- place key items **on a third** to draw attention to them (horizontal or vertical)
- try not to place the focus of the image in the centre

# Rule of Thirds

Use the **rule of thirds** to help **compose** “better” images

It will help to attract the viewers attention to the key parts of the image
