Order of work

1. Check your design sketches are done

2. Make sure you have a record company logo - export it as a PNG image

3. Finish the front cover

4. Work on the back cover - check the slides to see what's needed on it

5. Show your cover to a bunch of other people - get feedback, make changes etc...

6. Export it as a JPEG and send it to me

Important workflow points

1. Check the **size** of your background image is large enough

2. **Square crop your background image early** - you can't crop after you bring images into the template

3. **Export as a JPEG** before you bring into the template - or **Layers** > **Merge Visible**

4. **Add text in the final template** - otherwise it may be too small or too large
