

# CD Cover - Sourcing images

You **MUST** use high quality, large images

It simply won't work otherwise

The CD cover template has been produced at **300 pixels per inch resolution (300ppi)**. This is suitable for commercial printing.

If you try and use a low quality, small image it just won't be anywhere near big enough

# CD Cover - Sourcing images

Images you find “on the internet” may not be a suitable **file format**

- they might be **webp** files
- they might be **jfif** files

Neither will open in Photoshop

You need JPEG or PNG files

So, looking “on the internet” is not a reliable option

# CD Cover - Sourcing images

So, you need to source images that are:

- big
- high quality
- JPEG or PNG
- copyright free

So use the sources provided first

If you can't find what you need, **ask**
